

Anna Tapper Videos

We are regularly asked by parents to explain current maths strategies used at Abbots Green and whilst our written Calculation Policy is a comprehensive review of the Four Operations for each Year Group, we have additionally sourced a number of calculation videos which are available by following the link below. These are created by one of the Trust's Maths Specialists and cover a range of topics in a straightforward but detailed manner. The library of videos will continue to be updated with new material to support learning from home:
